JOURNAL OF wind engineering AND industrial aerodynamics

Contents Volume 53 (1994)

Vol. 53 Nos. 1, 2

Publisher's note v
Introduction ix
Committees x
Seminar program xi

Session I
Wind-driven rain and permeable facades

Parameters affecting the intensity of wind-driven rain on the front face of a building
E.C.C. Choi (Singapore, Singapore) 1
Wind, rain and the building envelope: a status report of ongoing research at the University of Western Ontario
D. Surry, D.R. Inculet, P.F. Skerlj, J-X. Lin, A.G. Davenport (London, Canada) 19
Wind loads on wind permeable facades
H.J. Gerhardt, F. Janser (Aachen, Germany) 37
Characteristics of the co-occurrence of wind and rain and the driving-rain index
E.C.C. Choi (Singapore, Singapore) 49
Pressure-equalized rainscreens: A study in the frequency domain
D.R. Inculet, A.G. Davenport (London, Canada) 63

Session II
Wind pressures on the envelope – internal

Area-averaged and internal pressure coefficients measured in the field
D.A. Smith, K.C. Mehta, B.B. Yeatts, S.V. Bhavaraju (Lubbock, USA) 89
Wind pressures on tropical housing
J.D. Holmes (Highett, Australia) 105
Internal pressures and interactions with the building envelope
B.J. Vickery (London, Canada) 125

Session III
Design guides and wind-borne missiles

Wind damage to envelope of houses and consequent insurance losses
P.R. Sparks, S.D. Schiff, T.A. Reinhold (Clemson, USA) 145
Towards reliability-based local design wind pressures for simple rectangularly-shaped buildings
J. Wacker (Birkenfeld, Germany) 157
Knowledge-based wind loading for envelope design: beyond building codes
T. Stathopoulos, H. Wu (Montreal, Canada) 177

Elsevier Science B.V.

Wind pressure loading cycles for wall cladding during hurricanes
C.W. Letchford (Brisbane, Australia), H.S. Norville (Lubbock, USA) 189
Windborne debris and the building envelope
J.E. Minor (Rolla, USA) 207
Hail impact on building envelopes
D.A. Paterson, R. Sankaran (North Ryde, Australia) 229

Session IV
Wind pressures on the envelope – peaks

The full-scale significance, on glass cladding panels, of data obtained from wind tunnel measurements of pressure fluctuations on building cladding
I. Calderone, J.C.K. Cheung, W.H. Melbourne (Clayton, Canada) 247
The estimation of wind loads on building attachments from local velocity data
A.J. Minson, C.J. Wood (Oxford, UK) 261
Pressure coefficients for low-rise building envelopes derived from full-scale experiments
R.P. Hoxey, A.P. Robertson (Bedford, UK) 283

Author index 53 (1994) 299

Vol. 53 No. 3

Publisher's note i
Aeroelastic characteristics of a stressed ribbon pedestrian bridge spanning 252 m
M. Pirner (Prague, Czech Republic) 301
Active simulation of time histories of strong wind gust in a wind tunnel
H. Kobayashi (Shiga, Japan), A. Hatanaka, T. Ueda (Osaka, Japan) 315
The relationship between the gust ratio, terrain roughness, gust duration and the hourly mean wind speed
J. Ashcroft (Berkshire, UK) 331
Numerical study of the turbulent flow over and in a model on a 2D hill
M.H. Kobayashi, J.C.F. Pereira, M.B.B. Siqueira (Lisbon, Portugal) 357
Effects of incidence and afterbody shape on flow past bluff cylinders
S.C. Luo, Md.G. Yazdani, Y.T. Chew, T.S. Lee (Singapore, Singapore) 375
An experimental study of the areodynamic behaviour of high sided lorries in cross winds
S.A. Coleman (Teddington, UK), C.J. Baker (Nottingham, UK) 401
Drag force on rotating racing cycle wheels
A.T. Sayers, P. Stanley (Rondebosch, South Africa) 431
Further experiments on Irwin's surface wind sensor
H. Wu, T. Stathopoulos (Montreal, Canada) 441
